## **Impel Line of Automated Crushers**

### **Our "Big 8" Oil Filter Crusher**

The "Big 8" Oil Filter Crusher is used by automotive service stations, d aftermarket to reduce the costs associated with waste disposal of used oi hazardous waste handler to pick up their used oil filters, our customers metal dealer pick up the crushed filters for free. They thus save money a

### **The Function**

This machine is powered by compressed air typical in an auto service e converts compressed air (100 to 150 psi) through a hydraulic / pneumati pressure on each oil filter that is to be crushed. By virtue of our unique turntable as the crushing process moves from one filter to the next. The that the maximum amount of oil seepage and removal is achieved. Once and will stop when all filters on the turntable are crushed. Therefore, wi will demand only minimal time from the service technician.
