[Foremost 1047 Dry Mask \(Wash Off\)](#)

Foremost 1047 Dry Mask is a transparent, pink tinted, sprayable, water based masking compound that dries to a tough, flexible film and allows easy removal of paint overspray. Foremost 1047 Dry Mask coats and seals delicate surfaces from the damaging effects of paint overspray and other solvent based materials. It is economical because it reduces both the amount of paper and tape used, and the time needed to apply them.

It is designed for use as a masking compound to protect automobiles and other surfaces from paint overspray. Foremost 1047 Dry Mask is used to protect plastic, cured paint, metal, vinyl, fiberglass, and any nonabsorbent surfaces.

[Foremost 1046-ES Clear Booth Mask \(Washable\)](#)

Foremost 1046-ES Clear Booth Mask is a clear, water white, sprayable, water based masking compound that air dries to a clear, flexible film that will wash away from the walls of a spray booth. It allows removal of paint overspray. The film has very good solvent resistance and is not attacked and weakened by common lacquer and enamel solvents. It is water rinsable.

In addition to paint spray booth applications, the product may also be used as a strip coating for furniture and metal fabricating industries, and as a temporary coating to protect tools, machine parts, silverware, etc., and provides temporary protection of various items during storage or shipment.

[Foremost 3126-ES Water Base Dust Command](#)

Foremost 3126-ES Water Base Dust Command is a unique liquid designed to attract dust and overspray to treated areas of paint spray booth and body shop floors, thereby reducing contaminants in wet finishes. Foremost 3126-ES also makes daily sweeping more efficient and faster. Dust Command is recognized by OSHA as a safety benefit as it reduces breathing of airborne dust.

[Foremost 550 Strip-Spray \(Aerosol\)](#)

Foremost 550 Strip-Spray Aerosol is a fast acting paint stripper especially formulated for easy removal of defective (peeler) automotive topcoats. Strip-Spray offers fast, effective removal of single stage enamel topcoats with minimum risk of damage to factory primers when properly used. It is versatile, useful on most hard surfaces. Adheres to vertical surfaces. A strong, hard working, fast acting multipurpose solvent.

[\(back to top\)](#)

Foremost 550 Strip-Spray Aerosol is recommended for use in removal of defective (peelers) factory topcoat paints from domestic cars, vans and trucks. It is also ideal for removal of plasticized topcoats from bumpers and trim and removal of paint from frame rails and suspension components. Removes old paint, lacquers, enamels, varnish, shellac, acrylics and other coated finishes easily from plaster, masonry, stone, wood, metal, glass, ceramics, and other materials in a few minutes.
