

Protect your 9" round drains—for only \$75!

- Made of flexible polyurethane to resist water, oils and many chemicals
- Strong urethane top layer resists tearing
- 12" in diameter—ideal for round drains up to 9" in diameter

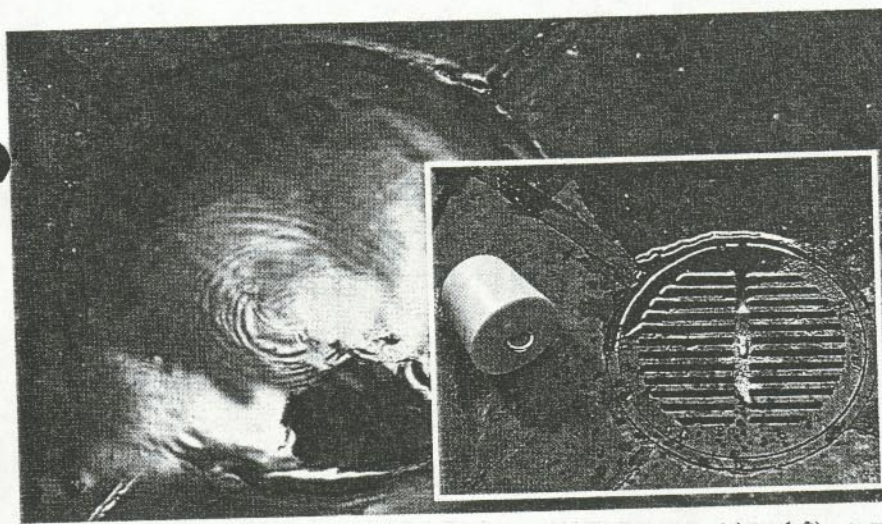

Our original DRAINBLOCKER® Drain Plug was so successful in protecting large, square drains that we created a smaller, round version to protect round drains. At 12" in diameter, it's the perfect size for covering small floor drains commonly found in plants.

Round DRAINBLOCKER® Drain Plug

Each	1-2	3+
PLR233 • 12" x 7/8" • 3 lbs.	\$75	\$69

NOTE: Call 1-800-DATA-HOG (328-2464) & get a FREE Chemical Resistance Guide through your fax machine, request List6, or call Technical Services at 1-800-HOT-HOGS* (468-4647).

Why seal your drains permanently with cement? Use our Conical Drain Plug instead.

When Drain Plug is in place (above left), no liquids can flow down drain. When you remove it, drain operation returns to normal, as shown above.

- Removable—allows your drain to function normally when plug is not in place
- Available in 3 sizes—seals drains from 2" to 4" in diameter
- Non-mechanical—just wedge Plug in drain

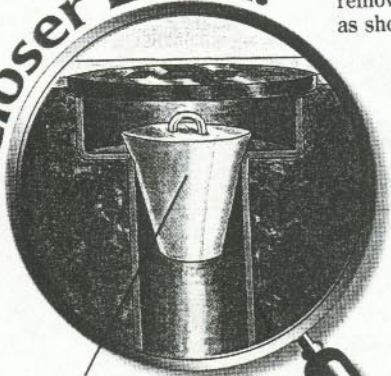

If you're responsible for preventing spills in your workplace and have helplessly watched as the wrong liquids went down the drain, you'll love our Conical Drain Plug. Durable, polyurethane plug forms a tight, chemical-resistant seal. It's the ideal alternative to permanently sealing your drains with cement. And it's ideal for general maintenance use—you can keep the Plug in the drain with the drain cover in place. Removes easily with hand tools to restore drain function.

Kit is packed in a plastic case for easy storage.
