Chargers

Saitek 'Eco-Charger' No need to throw away weak batteries with the ECO-CHARGER. Actually recharges regular brand name alkaline, carbon zinc and NiCad batteries. Accommodates any combination of up to four D, C, AA or AAA size cells at one time. Unlike other chargers, Eco utilizes a microchip to analyze batteries. Large LCD screen displays analysis of each battery, indicates level of charge still available in battery and time needed to recharge. Stops automatically when battery is recharged - never overcharges. Rejects dead batteries (batteries that will not hold a charge) right away. ECO CHARGER also helps prevent the dreaded "memory effect" when constantly recharging NiCad batteries. NiCad batteries are completely discharged before beginning the recharge cycle. Earth friendly - helps reduce landfills of toxic waste. Box Dimensions: 40 x 22 x 14.5 cm (15.7 x 8.7 x 5.7 inches) Warranty: Saitek Products carry a one year limited warranty against defect.

Price is \$59.95

Saitek 'Smartcharger' The fastest model on the market, the Smartcharger is for use with Ni-Cad and NiMH batteries (AAA, AA, C, D, Prismatic and 9V). The Smartcharger is specifically designed to deliver ultra-fast charging, conditioning and checking. With a large LCD panel that keeps users fully informed of charging status and battery conditions, the Smartcharger's sophisticated microprocessor with fuzzy logic recognizes battery types and monitors the charging process. Bad batteries are automatically rejected. Easy to use. Just insert batteries and close the lid! Warranty: Saitek Products carry a one year limited warranty against defect.
