

We've got a PIG® Pillow for any leak, any spot!

- PIG® Pillows fit into small spaces to absorb machine drips and leaks one drop at a time
 - PIG® Pillows absorb oils, water, coolants and solvents
 - Tough polypropylene cover—resists tears, ruptures and rough handling
 - Low ash content makes PIG® Pillows ideal for incineration
 - Available in three sizes to handle a variety of drips and leaks
- Let's face it, there are some leaks and drips that are just impossible to reach and clean up. You know, those tight spaces under machines, beneath

hydraulic lines and in cramped corners. Now there's a quick and easy solution: the PIG® Pillow. Just toss a Pillow under a leak or drip and remove it when it's fully saturated. Fast-wicking filler absorbs liquids the instant they hit the Pillow.
