

The first protective storm drain insert on the market that can be opened and closed in seconds—and it's only from New Pig!

Adjustable hanging brackets permit a precise fit in drain opening.

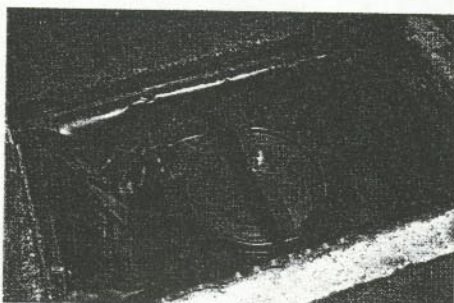

Includes T-wrench with 3/8" hex socket for easy opening and closing.

Lid easily opens and closes for everyday or emergency use.

Flexible apron can be trimmed for a "customized" fit.

- Seals square or rectangular storm drain openings up to 2' x 4'—ideal for spill response or for protection during liquid loading and unloading operations near drains
- Hand-cranking mechanical sealing device—opens to allow normal stormwater to run off, but cranks shut to prevent spills from entering
- Durable urethane-coated woven polyester apron—withstands the effects of harsh weather and time
- Made of durable powder coated steel with a stainless steel threaded adjustment rod—resists rust and corrosion
- Includes 2 tubes of polysulfide caulking for easy installation

When tightly closed, Drain Shield™ Drain Barrier effectively seals drain opening—liquids can't enter your stormwater system.

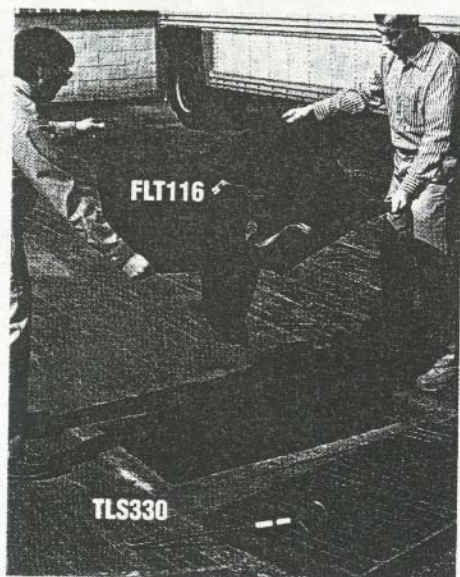

Drain Maintenance Tip:

Make storm drain maintenance part of your regular routine! In order for storm drains to operate effectively, the trash and silt that collects in them must be removed on a regular basis. From time to time, inspect your drains and remove debris. By doing this, runoff will flow uninterrupted through your drain system.

Drain Shield™ Drain Barrier

PLR221 • Dim: 20" L x 20" W x 13" H
Apron Dimension: 84" L x 58" W • 46 lbs. \$689

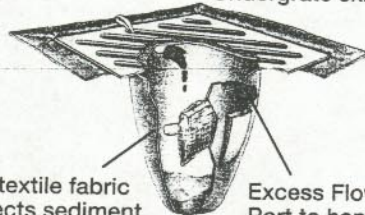

This product is covered by our 1-year limited warranty. For complete warranty information, contact us at 1-800-HOT-HOGS®.

Keep sediment and debris out of your drains!

Beef up your Stormwater Pollution Prevention Plan! Install a PIG® Drain Insert in your drain—it'll help you comply with 40 CFR 122. 26 [1999]. Available in Sediment and Oil and Sediment versions, this polypropylene geotextile insert fits storm drains up to 30" x 40" in size. Its 18" deep accumulation pocket collects oil, sediment and other contaminants. Oil and Sediment Insert includes a skimming pillow to remove floating oil and other hydrocarbons. Both versions are designed with an excess flow port to avoid blockage during periods of high water flow.

Undergrate skirt

Geotextile fabric collects sediment, but allows water to flow through.

Excess Flow Port to handle peak storm water volume.

Drain Insert for Oil and Sediment

Each	1-3	4+
FLT116 • Skirting 48" W x 36" L with Skimming Pillow • 6" dia x 12" L • Abs. 41 oz. • 2 lbs.	\$94	\$83
FLT117 • Replacement Pillow • 6" dia x 12" L Absorbs 2 gal./case • 10/case • 18 lbs.	\$230	\$216

Drain Insert for Sediment Only

Each	1-3	4+
FLT118 • Skirting 48" W x 36" L Absorbs 14 oz. • 1 lb.	\$63	\$58

Grate Lifting Hook

Each	1-4	5+
TLS330 • 26" L • 3 lbs.	\$69	\$56
