

# StreamGuard® Inlet Protection

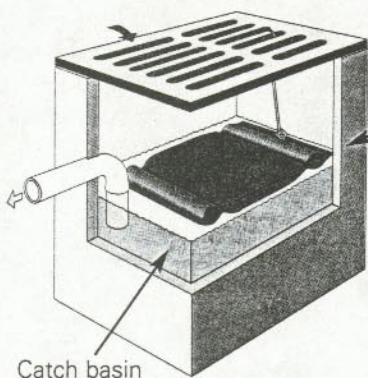

Ask for it by name!

## Our polymer removes oil from water...permanently!

### StreamGuard Passive Skimmer

The Passive Skimmer is designed to float in the sump of ordinary catch basins, oil/water separators, and storm water vaults. Unlike common absorbents, the StreamGuard polymer media will not deteriorate or release absorbed hydrocarbons. This innovative polymer absorbent is contained in a screen pillow which allows for long-term exposure to oil-contaminated water. The Passive Skimmer is particularly effective in capturing hydrocarbons which otherwise accumulate at the surface of sumps then discharge suddenly during the peak flow of a rain storm event. Unlike catch basin filters which attempt to filter oil from sediment-containing storm water, the Passive Skimmer is not affected by sediment and will not clog. The Passive Skimmer will not impede the flow of water through the storm water collection system. This technology may be installed in virtually any sump, vault, catch basin, or oil/water separator with complete confidence that no ponding or flooding will occur. Size: 22.5" x 14" x 2".

StreamGuard Passive Skimmer

Catch basin

#3017 StreamGuard Passive Skimmer

Integral flotation

Over 200 sq. in. of surface coverage

Oil absorbing polymer

Recovers oil from stormwater discharge

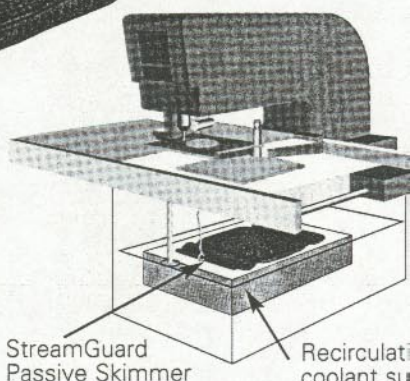

Connector hardware & line

Absorbs up to 2 gallons of oil!

## StreamGuard®

Continuously absorbs tramp oil, extending coolant life

StreamGuard Passive Skimmer

Recirculation coolant system

ITEM#	PRICE			WEIGHT (LBS.)	CAPACITY (GAL.)
	QTY 1-4	QTY 5-9	QTY 10+		
<b>★ PASSIVE SKIMMER 2/PACK</b>					
3017	\$125	\$119	\$113	8	2 /UNIT
<b>★ PASSIVE SKIMMER 5/PACK</b>					
3018	\$278	\$264	\$250	20	2 /UNIT

More and more municipalities are accepting our Passive Skimmer for use in catch basins in lieu of small oil/water separators for parking garages and small parking lots. This makes sense because it is much easier and more cost effective to periodically replace the Passive Skimmer than to pump out an entire oil/water separator.

#3032 Tracer Dye

## Test for illicit connections!

### Fluorescein Tracer Dye

Where does your stormwater drain? NDPEs permits prohibit illicit connections to your storm sewer. Dissolve tracer dye in water, pour into a drain with a suspected connection to your storm drain, and flush with water. Look for the telltale green color in your storm sewer to indicate a connection. Non toxic, Non harmful. 1/Box.

#3019 Stencil Kit

## Stencil your stormdrains!

### "Drains To Stream" Stencil Kit

Did you know that in many areas businesses are required to stencil or mark their stormdrains to prevent accidental illicit contamination of storm water? If not required, these large 10 mil Mylar stencils produce a clear, neat image communicating your commitment to environmental protection. 1 Stencil & 8 oz. Can Utility Marking Paint (white)/Kit.
