

AEC Sewer Discharge System SD-25

Designed and Developed by American Equipment Co., Inc.

The advanced technology of this pre-treatment Sewer Discharge System has proven to avoid contaminated water discharge by filtering out harmful grease, oil, cleaning solvents, heavy metals and other pollutants. This water recycling system enables your cleaning operation to treat wash waters, meeting local, state, and federal standards for discharge to sewer.

Features and Benefits:

- * Stops pollution
- * Maintenance free
- * Exceeds D.E.Q. requirements
- * 10 year warranty against rust out
- * Incorporates multiple technologies

Typical Installations:

- * Schools
- * Manufacturing plants
- * Government agencies
- * Agricultural operations
- * Transportation companies
